

DT CONNECT

Streamlined testing & asset management

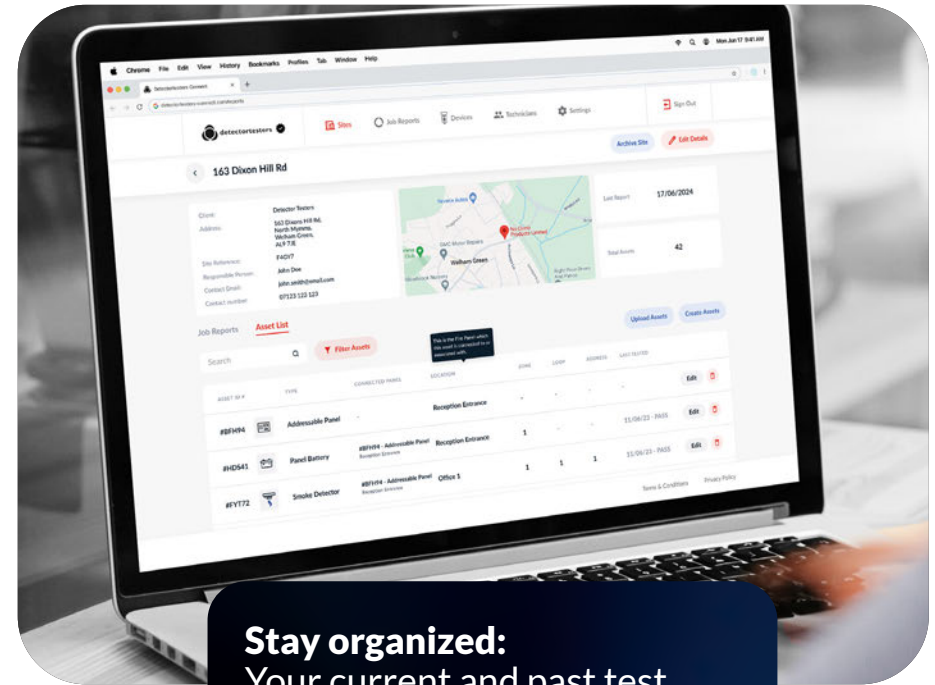

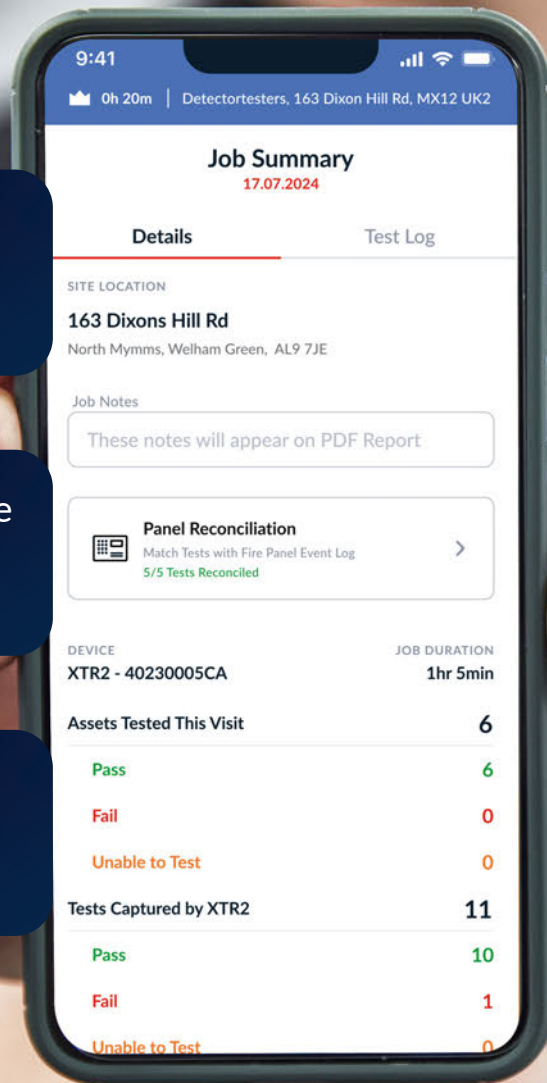

XTR *series*

Everything tracked:
Manage all your site devices efficiently.

Real time results: Capture and record test results as you go.*

Automated reporting:
Instant generation of detailed test reports.

Stay organized:
Your current and past test history all in one place.

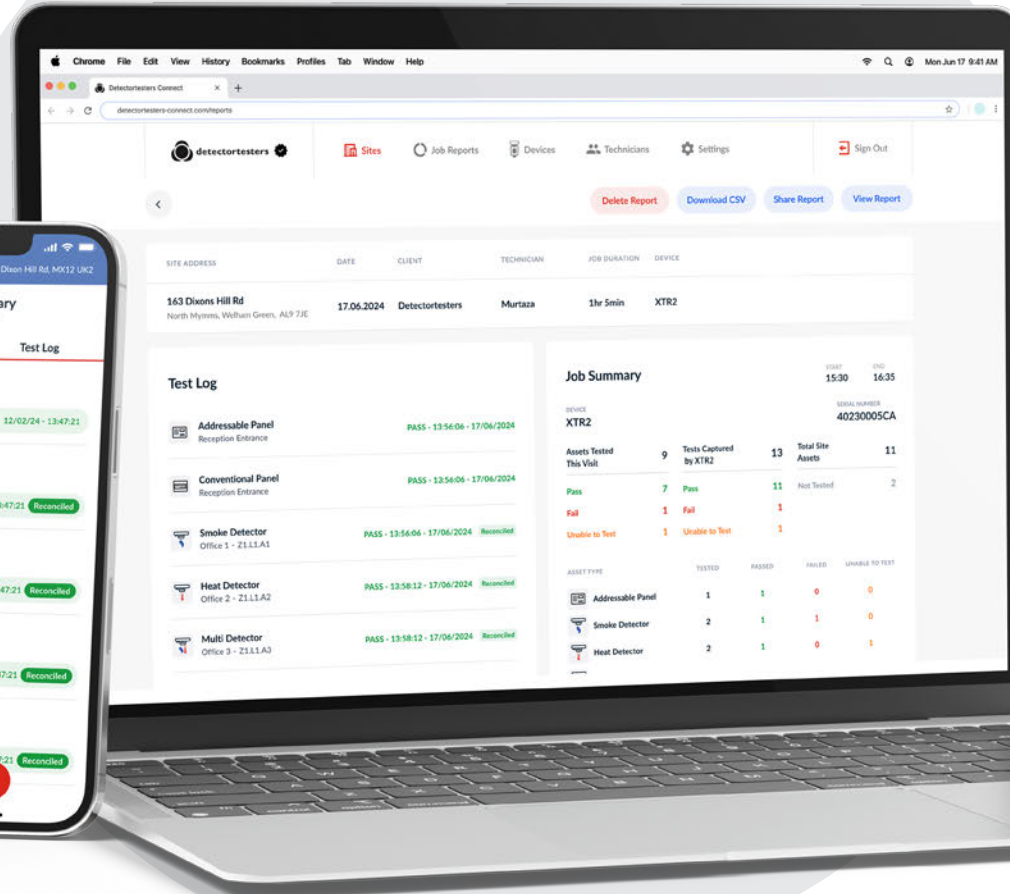

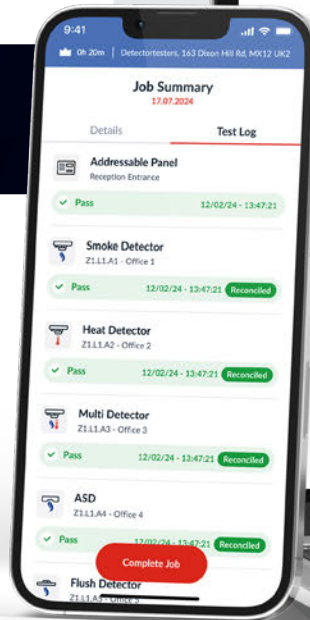

Ditch the Paper. Deliver Faster.

Replace clunky worksheets with a streamlined, compliant testing and reporting workflow — built for technicians who want to get it right, fast.

Key features that drive efficiency, accuracy and compliance

- > Automated Testing
- > Asset Creation*
- > Existing Site Testing*
- > Asset Filtering*
- > Panel Verification*

App

Web Portal

- > Site Management
- > Site Asset List*
- > PDF Report Generation*
- > CSV Asset Upload*

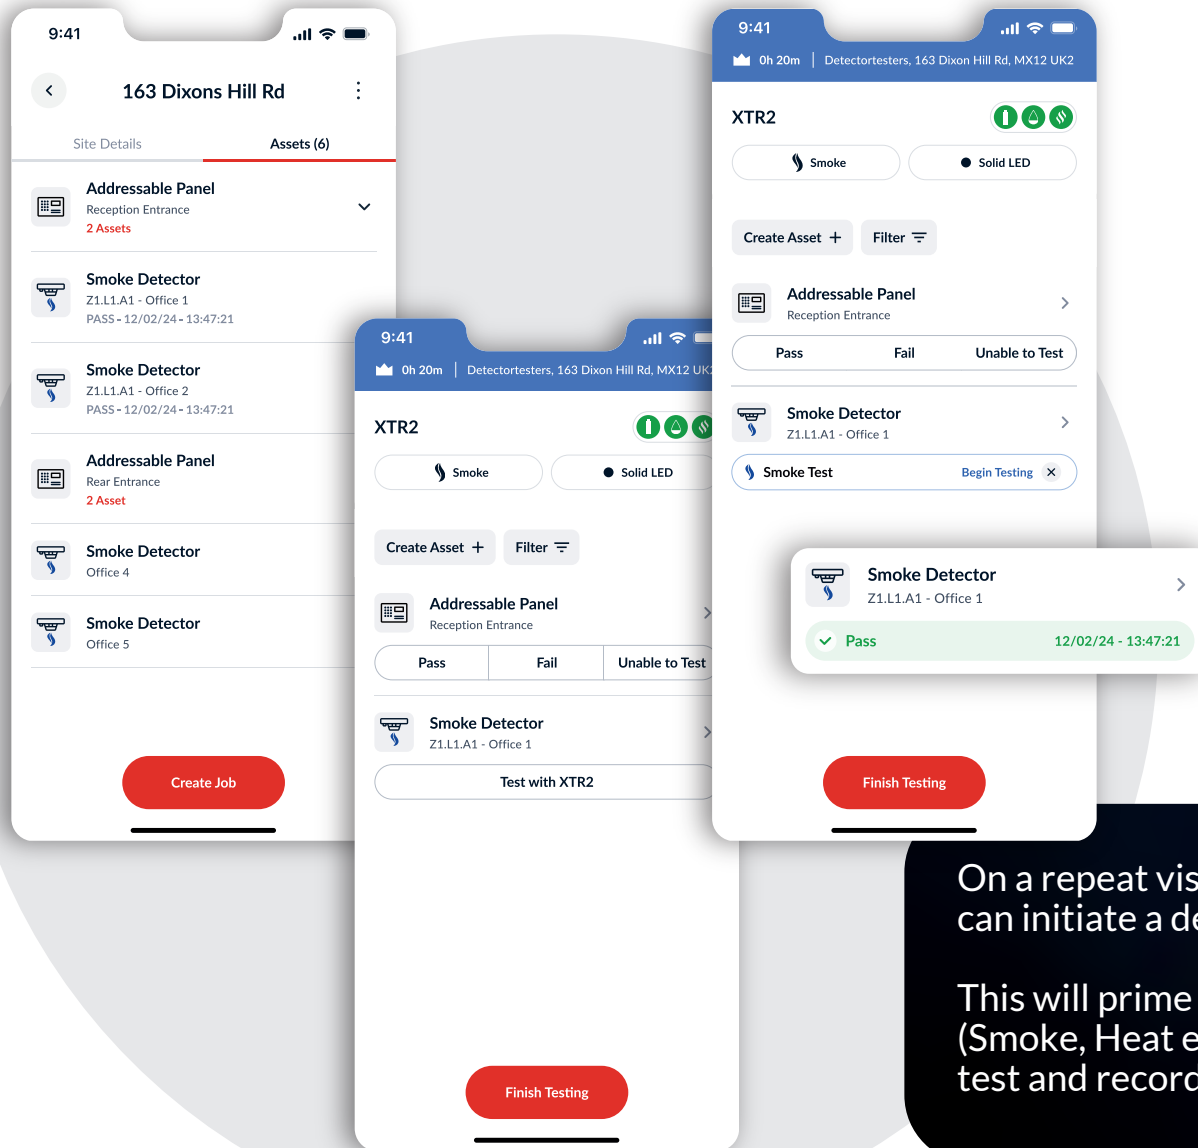

A streamlined testing process

Sites & asset lists enable the technician to perform repeat visits using data stored from first inspection.

Not only can they see what has been tested already, the technician can select and test assets faster than ever. No more data entry, no more paperwork.

On a repeat visit with XTR2, the technician - in one tap can initiate a detector asset test using 'Test with XTR2'.

This will prime XTR2 with the correct test type (Smoke, Heat etc) for the technician to perform the test and record the result against the asset.

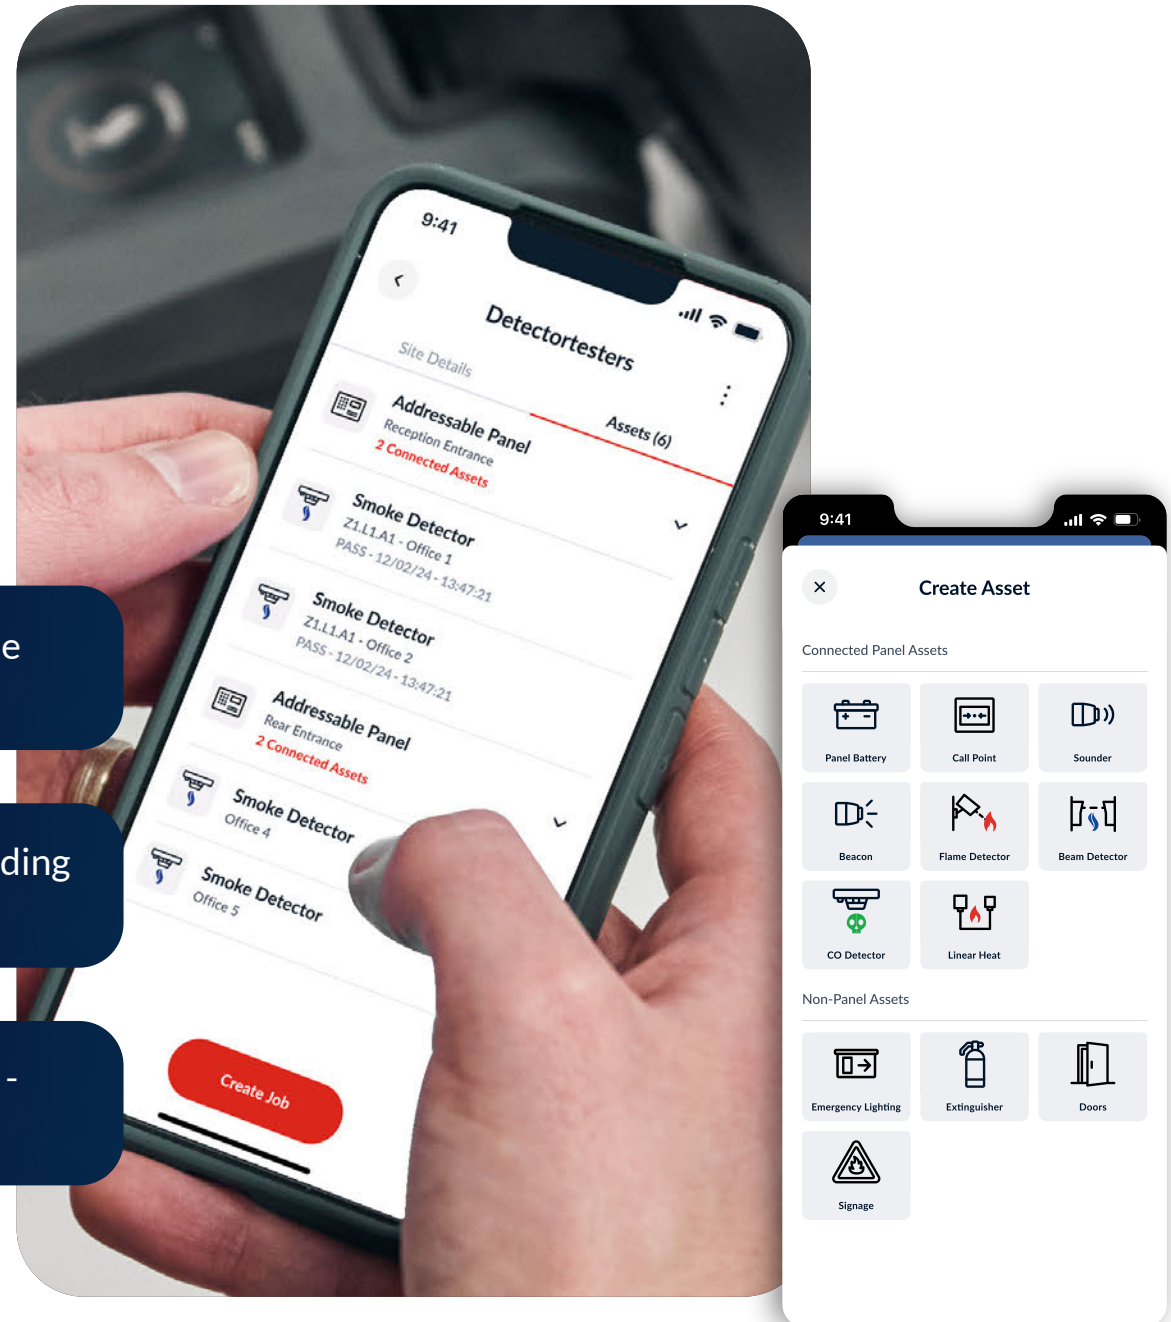

Comprehensive asset management

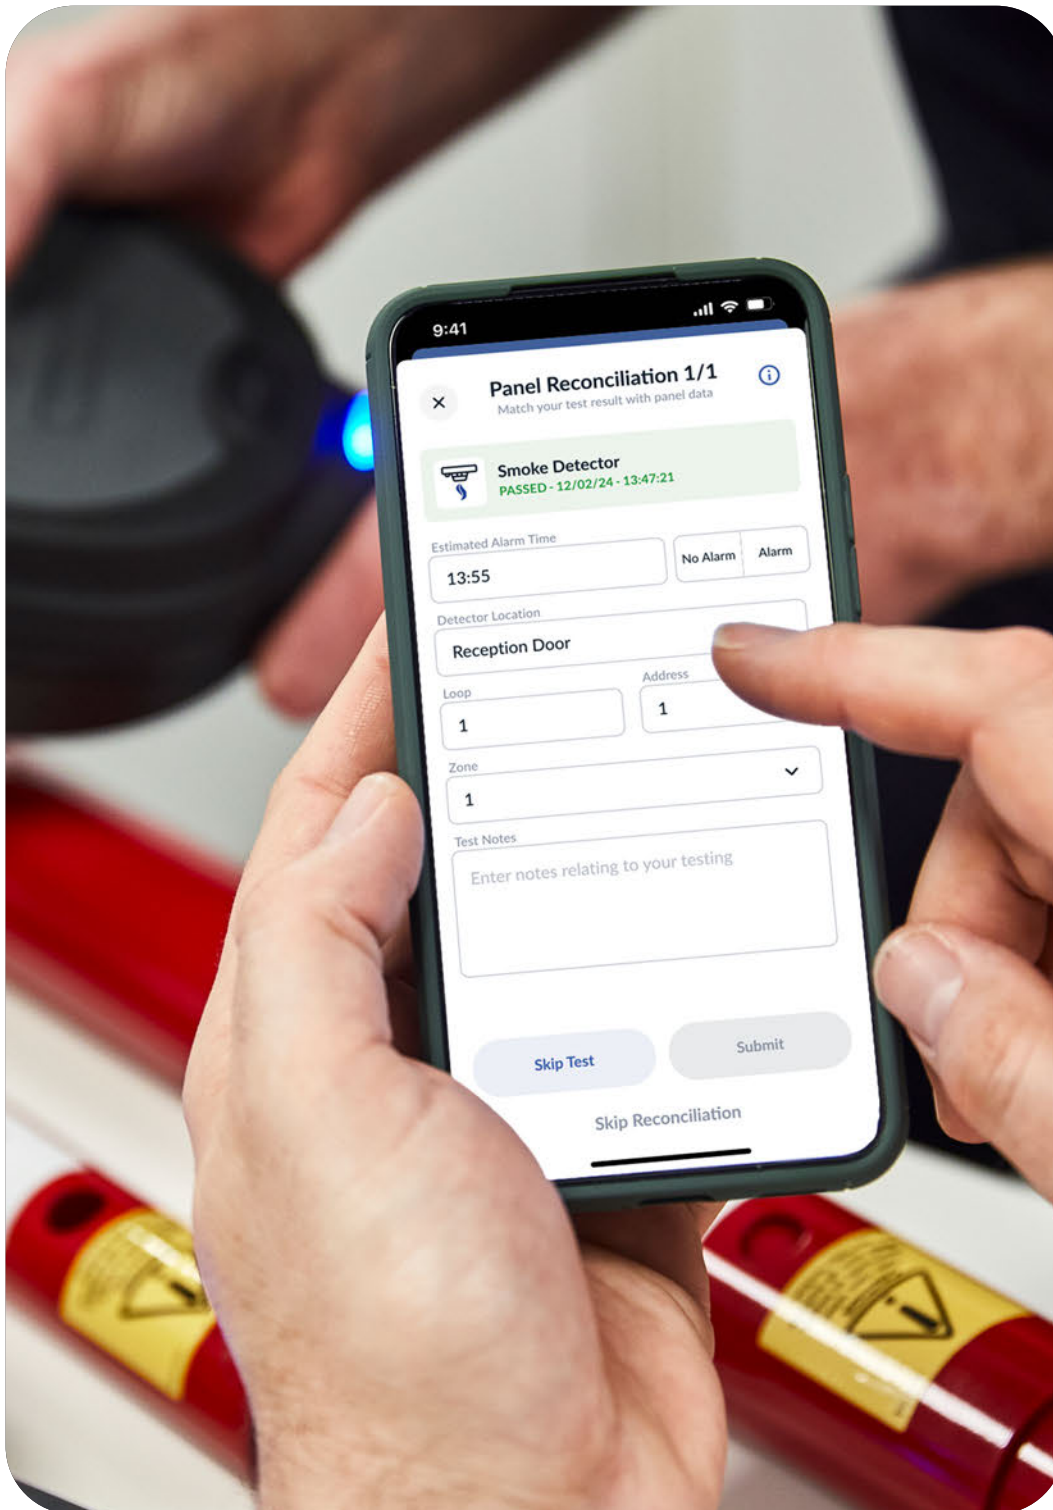

Build complete asset lists for each of your sites as you test, giving you the option to input location, loop and address.

Create site pages for each building and include the asset list and related reports.

Accurately account for all assets on site, including detectors, call points and emergency lighting.

Build a history of when each asset was tested - ready for future site visits.

Full test loop. Closed.

Verify each of your tests against the fire panel event log to ensure complete and accurate test records.

- > Use the estimated alarm time to find the panel event corresponding to your test
- > Select either 'alarm', or 'no alarm' to show that your test results have been acknowledged by the panel
- > Full testing loop ensured through visual detector LED and panel verification

Cloud portal

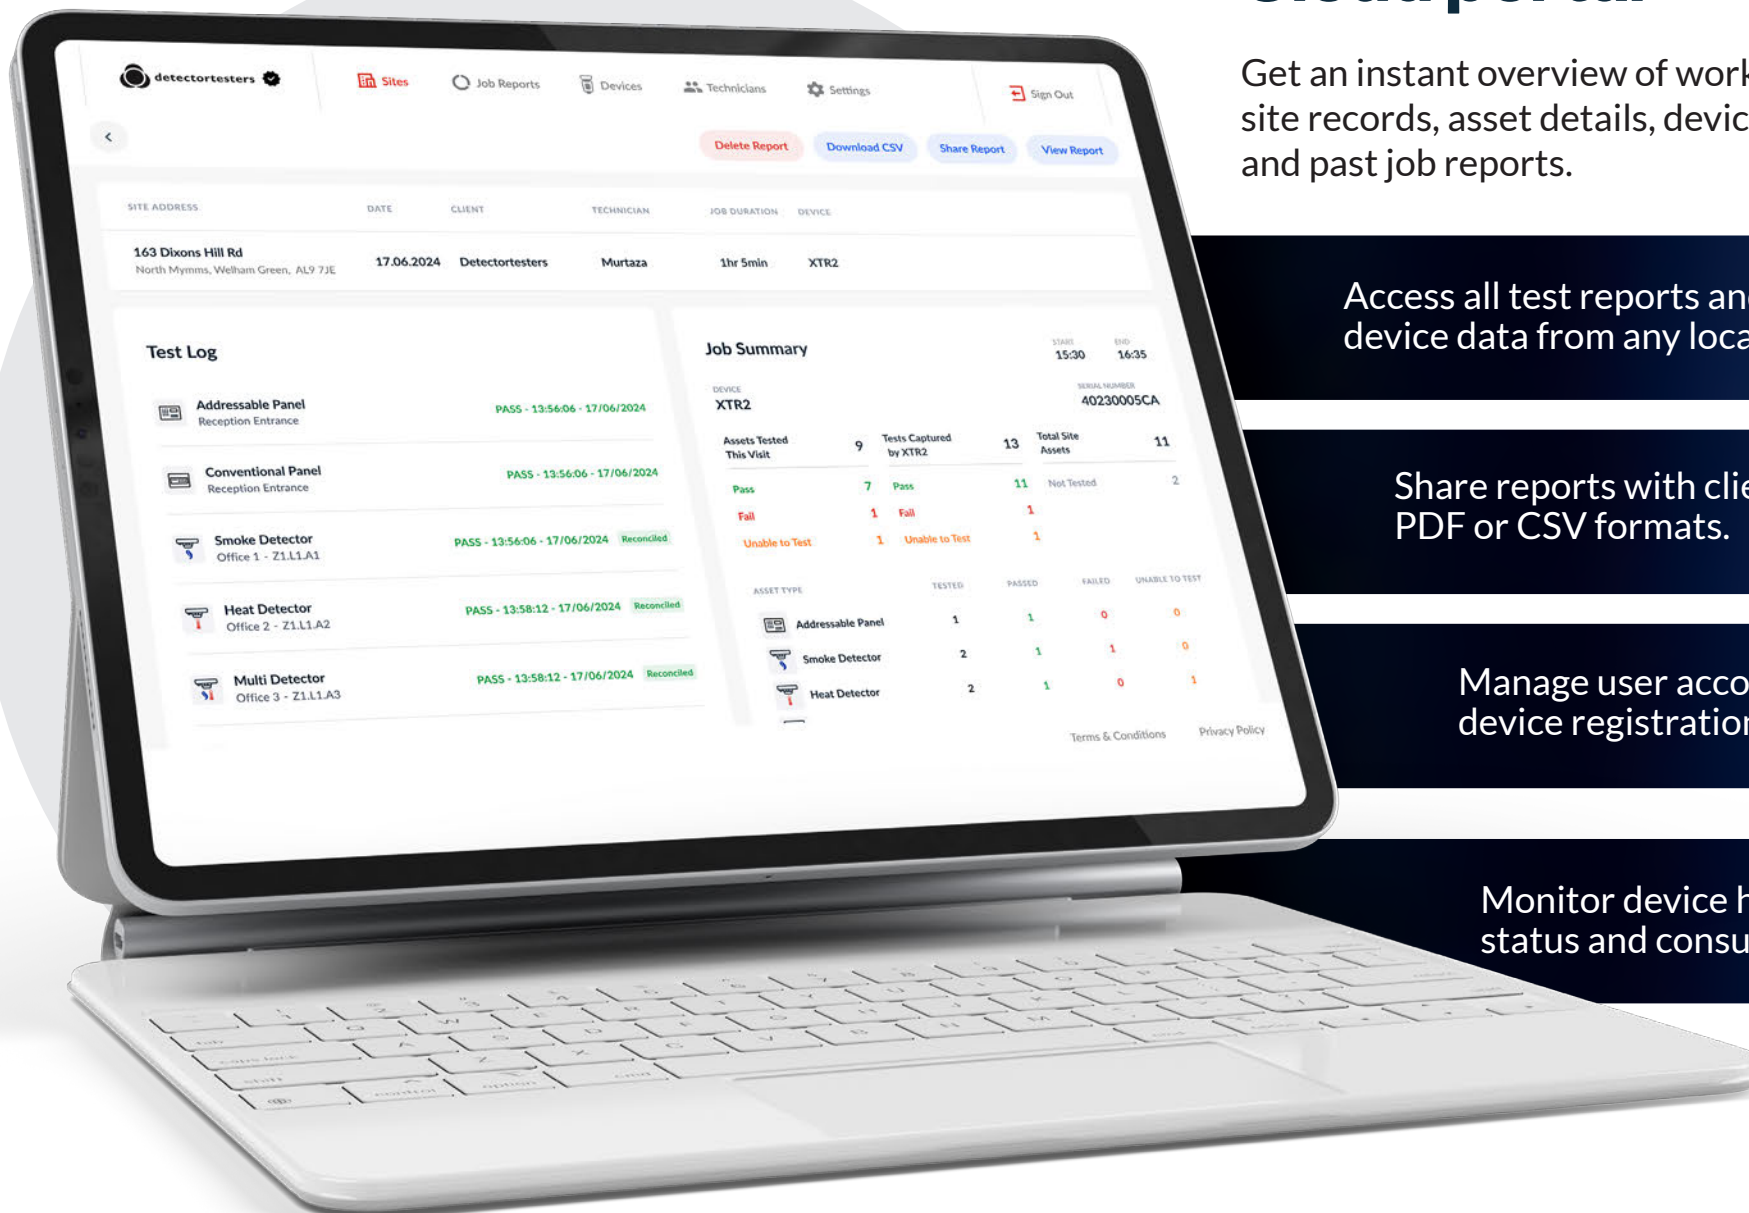

Get an instant overview of work carried out, site records, asset details, device information and past job reports.

Access all test reports and device data from any location.

Share reports with clients in PDF or CSV formats.

Manage user accounts and device registrations.

Monitor device health, battery status and consumable levels.

The screenshot shows the 'Sites' tab in the DT Connect application. The top navigation bar includes 'detectortesters', 'Sites', 'Job Reports', 'Devices', 'Technicians', 'Settings', and 'Sign Out'. The main header displays the site name '163 Dixon Hill Rd' with 'Archive Site' and 'Edit Details' buttons. Below this, the site details are organized into three sections: client information, a map, and summary statistics.

Client Information:

- Client: Detector Testers
- Address: 163 Dixons Hill Rd, North Mymms, Welham Green, AL9 7JE
- Site Reference: F4GY7
- Responsible Person: John Doe
- Contact Email: john.smith@email.com
- Contact number: 07123 123 123

Map: A map showing the location of the site, with markers for 'Reverie Autos', 'BMC Motor Repairs', 'Welham Green', 'Mymms Club', 'Willowbrook Nursery', 'No Climb Products Limited', and 'Right Pavé Drives And Patios'.

Summary Statistics:

- Last Report: 17/06/2024
- Total Assets: 42

Job Reports: A table showing the history of job reports for this site.

DATE	TECHNICIAN	ASSETS TESTED	PASS	FAIL	UNABLE-TO TEST	NOT TESTED	JOB DURATION	
24.12.2024	Murtaza	48	22	1	1	0	1hr 5min	View
17.06.2024	Murtaza	48	22	1	1	0	1hr 5min	View
05.06.2024	Murtaza	24	22	1	1	0	1hr 5min	Transfer Assets View

A tooltip message appears over the 'View' button for the 17.06.2024 report: 'This report is from a previous version. Transfer its assets to Site Assets for use in repeat visits.'

The sites tab centralizes site records, storing asset details and past job reports for instant access.

With secure cloud storage and offline capability, technicians can work seamlessly on-site and sync jobs later—eliminating lost paperwork and missing logs.

Centralized site records

The screenshot shows the 'Asset List' tab in the DT Connect application. The top navigation bar includes 'Job Reports' and 'Asset List'. The main header displays a search bar, a 'Filter Assets' button, and 'Upload Assets' and 'Create Assets' buttons.

Asset List Table:

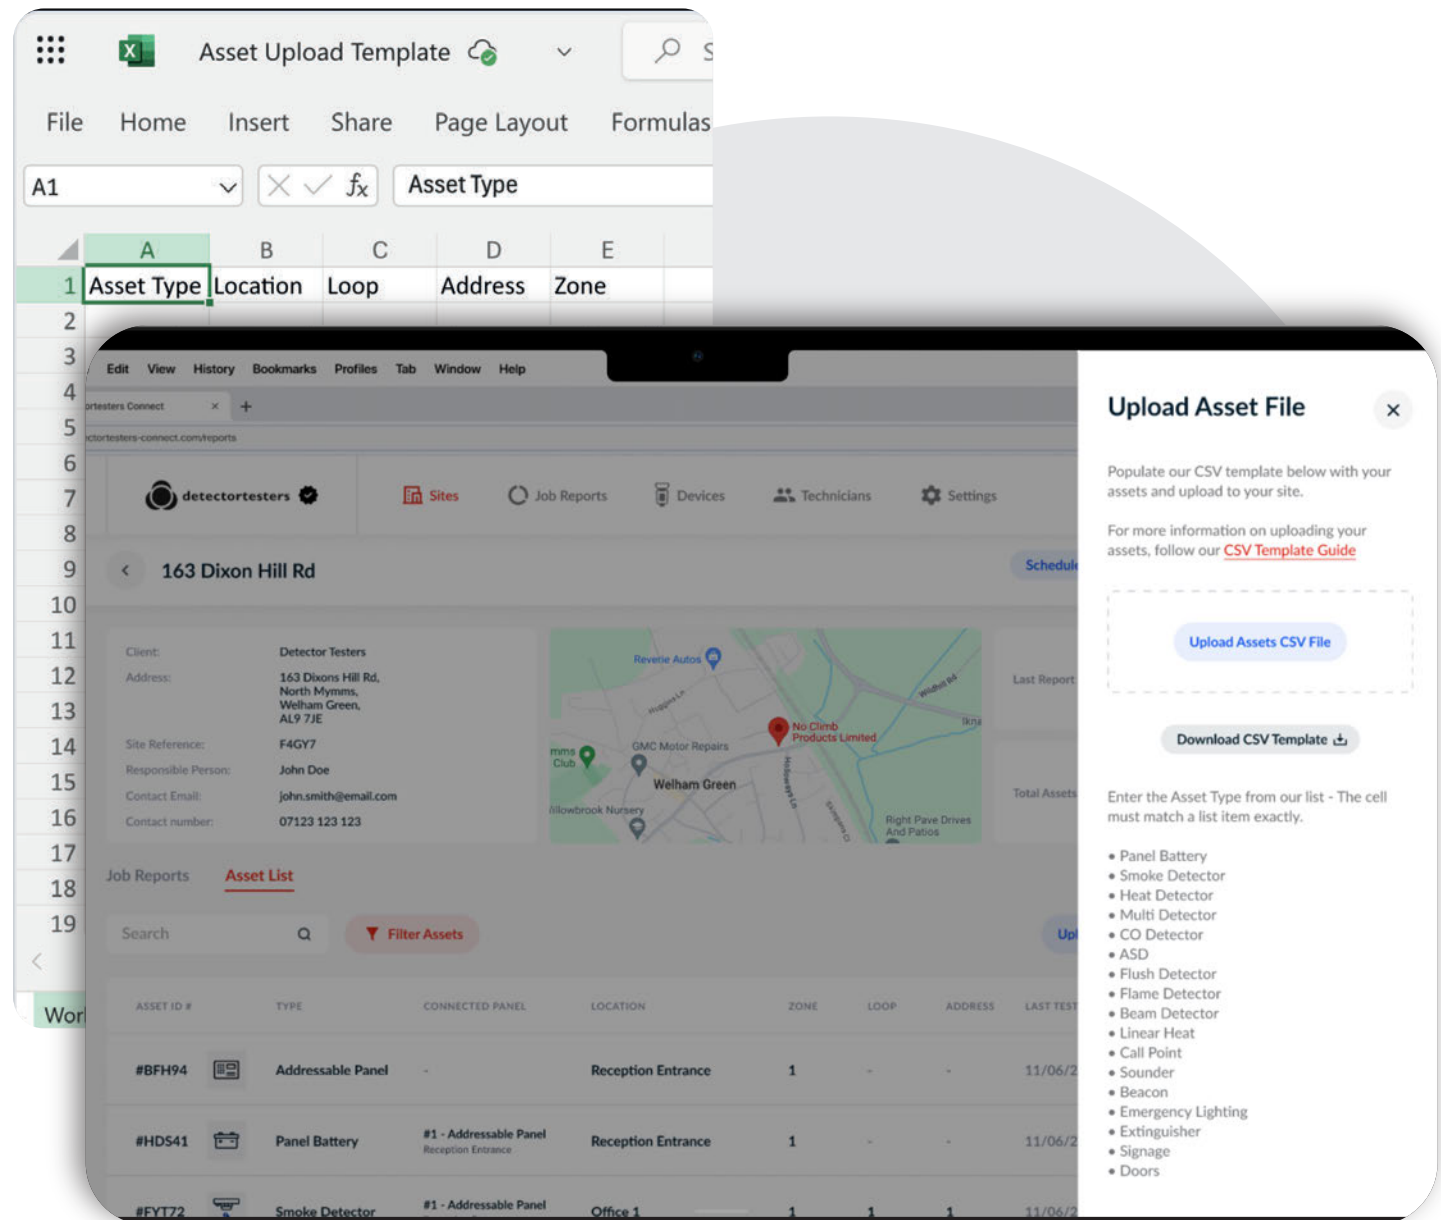

ASSET ID #	TYPE	CONNECTED PANEL	LOCATION	ZONE	LOOP	ADDRESS	LAST TESTED	
#BFH94	Addressable Panel	-	Reception Entrance	-	-	-	-	Edit Delete
#HDS41	Panel Battery	#BFH94 - Addressable Panel Reception Entrance	Reception Entrance	1	-	-	11/06/23 - PASS	Edit Delete
#FYT72	Smoke Detector	#BFH94 - Addressable Panel Reception Entrance	Office 1	1	1	1	11/06/23 - PASS	Edit Delete

At the bottom of the page, there are links for 'Terms & Conditions' and 'Privacy Policy'.

Transfer your asset data

Easily transfer asset data from existing spreadsheets or systems, seamlessly integrating old records into the automated DT Connect workflow.

- > CSV Template provided

Instant test reports

Auto-generated reports, instantly available after the job is completed.

Get a full test breakdown, digital signatures, and easy sharing methods. Ensure a seamless digital audit trail and client confidence.

Report breakdown:

Job summary: Overview of the testing carried out, with a table including a summary of test results organized by asset type (only visible if you tested an asset).

Assets tested this visit: View of all tested assets, including asset information, and result. Ordered by result type.

Tests captured by XTR2: Chronological test log pulled directly from the device. Showing tests carried out, (smoke, heat, combined etc.).

XTR2

ENGINEERED FOR FASTER TESTING

Designed to work with all detector brands and models, with both addressable and conventional systems.

- > Rapid Smoke Generation
- > Faster Heat and Hi-Heat Activation *
- > Automatic Test Result Capture
- > Clearing Mode to Prevent Re-Alarms
- > Adaptable for ASD testing
- > Touchscreen User Interface
- > Seamlessly integrates with DT Connect

* 50% Faster heat activation than Testifire 1000
